

Plate Type Magnetic Separator

Purpose

To collect ferrous particles like bur, chips, washers, nails screws etc. from shop floor as well as from congested places.

Construction

Overall body is made in MS fabrication and SS 304 grade steel material. It consist powerful permanent magnets

Operating Method

Basically its handy instrument. It moves on the floor by maintaining distance between floor and magnet. The powerful magnets attract ferrous particles from floor. Collected ferrous material can be removing by opening SS flap.

Advantages

- Fatigue reduces. (save energy)
- Increasing productivity.
- Increasing quality.
- No Electricity is required.
- Absolutely environmentally friendly (No gases chemicals generated)
- No maintenance is required.

Area of application

Food industries ,Plastic industries, Automobile industries, Recycling industries etc.

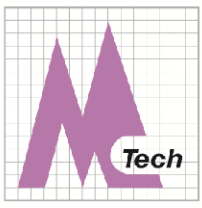

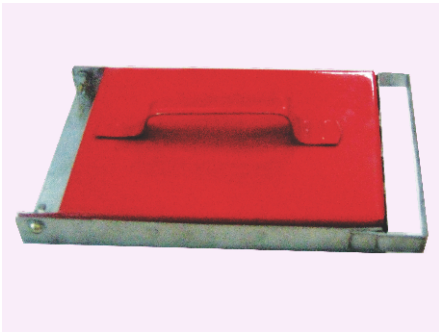

Plate Type Magnetic Separator

Available Sizes

Model Code	Size (L x W x H)
018-10-01	L175 xW125 H30

Applications

Position 1

Position 2

Position 3
